

# **SUBSTANCE ABUSE TREATMENT FACT SHEET**

## **Massachusetts Department of Public Health, Bureau of Substance Abuse Services**

*This fact sheet contains information about the impact of alcohol and other drug use in the Norfolk and Plymouth Senatorial District. Admission data were reported to the Bureau of Substance Abuse Services (BSAS) Substance Abuse Management Information System in FY 2003.*

### **Residents of Norfolk and Plymouth Senatorial District**

#### **Characteristics of Admissions**

In FY 2003, there were 115,896 admissions to licensed substance abuse treatment services in all of Massachusetts; 3.5% (4,010) of these admissions reside in the Norfolk and Plymouth Senatorial District. 6% (221) of admissions from the Norfolk and Plymouth Senatorial District were under 17 years of age. **Please note that these statistics represent only individual admissions, and represent a figure lower than the actual number of constituents in need of treatment services.** In FY 2003, admissions to all residential and outpatient substance abuse treatment services from Norfolk and Plymouth Senatorial District reported the following characteristics:

- 72% were male and 28% were female.
- 62% were between the ages of 30-49.
- 84% were white non-Latino, 8% were black non-Latino, 4% were Latino and 4% were other racial categories.
- 68% were never married, 11% were married, and 20% reported not to be married now.
- 24% had less than high school education, 55% completed high school, and 21% had more than high school education.
- 19% were employed.
- 30% were homeless.
- 34% had prior mental health treatment.

#### **Primary Substance of Use**

At admission clients also identify a “primary drug” of use that is the substance for which the client is seeking treatment. Table 1 compares the proportional distribution of primary drugs in Massachusetts with that for the Norfolk and Plymouth Senatorial District.

<b>Table 1</b>					
<b>Primary Drug by District and State FY 2003</b>					
	Alcohol	Heroin	Marijuana	Cocaine	Crack
District	50%	33%	4%	3%	2%
State	43%	38%	6%	4%	4%

#### **Substances Used in Past Year**

Upon entering treatment, each client is asked to report ALL substances used in the past year (12 months) prior to admission. Admissions frequently report using more than one substance within the year. The use of more than one psychoactive substance, such as alcohol and marijuana, is referred to as ‘polydrug’ or ‘polysubstance’ use.

Table 2 shows ALL substances which clients reported using in the year prior to admission, including the prevalence of injection drug users (IDU's), individuals who use a needle to ingest cocaine, crack, heroin or another drug to get high.

<b>Table 2</b> <b>Annual Admissions by Substance Used: FY 1995 – FY 2003</b>							
Norfolk and Plymouth Senatorial District							
	Total	Alcohol	Marijuana	Cocaine	Crack	Heroin	IDU
<b>FY '95</b>	3,056	2,459	639	971	548	857	686
<b>FY '96</b>	3,095	2,493	803	996	646	937	726
<b>FY '97</b>	3,520	3,027	1,066	1,242	871	1,052	790
<b>FY '98</b>	4,046	3,355	1,191	1,227	873	1,298	938
<b>FY '99</b>	4,084	3,342	1,114	1,328	931	1,402	1,052
<b>FY '00</b>	4,257	3,445	1,118	1,235	817	1,435	1,068
<b>FY '01</b>	4,847	3,788	1,152	1,375	830	1,716	1,225
<b>FY '02</b>	4,750	3,509	997	1,243	614	1,754	1,282
<b>FY '03</b>	4,010	2,787	842	1,018	524	1,509	1,078

### Heroin and Injection Drug Use

Figure 1 below shows the proportional increases in all admissions in the Norfolk and Plymouth Senatorial District and the proportional increase in admissions reporting heroin and injection drug use, a factor driving increases in HIV.
